#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-6 and 8-14 rejected under 35 U.S.C. 102(e) as being anticipated by Pederson (US 6,462,669 B1).

3. Re claims 1 and 8: Pederson discloses a modular light assembly having a common printed circuit board base (238 in Fig. 19 and 280 in Fig. 23), one of a first and a second illumination source, wherein the first and the second illumination sources are of different types (See 240 in Fig. 19), a mounting bracket (340 in Fig. 41) for attaching the illumination source to the printed circuit board base. Further, Pederson discloses a method of installing the modular light assembly in a vehicle comprising a step of mounting the modular light assembly onto the trim bezels (392 in Fig. 26).

Re claims 2-3, 9-10: Pederson discloses the electrical circuit having an electrical wire (242) and an electrically conductive trace.

Re claims 4, 11: Pederson discloses light emitting diodes (240) and incandescent bulbs (226).

Re claims 5, 12: Pederson discloses a switch (50 in Fig. 34).

Re claims 6, 13: Pederson discloses that the common printed circuit board base is integrally formed with a vehicle wiring harness assembly (col. 19, lines 52++).

Art Unit: 2875

Re claim 14: Pederson discloses a method of installing a wiring harness assembly in a vehicle comprising the steps of assembling a wiring harness assembly comprising a plurality of wires (202 in Fig. 17), connectors (40), and light assemblies (200), wherein the connectors and the light assemblies are connected to ends of the wires (See Fig. 17); and subsequently installing the wiring harness assembly into a vehicle component, such that the light assemblies can be mounted to trim bezels (392) (col. 19, lines 1-5).

***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 7 and 15-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pederson as applied to claims 1 and 14 above, and further in view of Barnett et al. (US 6,541,800 B2). The teachings of Pederson have been discussed above.

Re claims 7 and 15-20: Pederson does not disclose a plurality of outwardly extending mounting fingers of the trim bezels. However, Barnett teaches a plurality of outwardly extending mounting fingers (54 in Fig. 5) of the trim bezels (40). It would have been obvious to one having ordinary skill in the art at the time of the invention to employ Barnett's mounting fingers onto Pederson's trim bezels in order to provide a easy connection to the trim bezels.

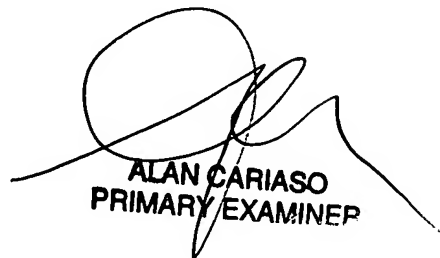

***Conclusion***

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Guiyoung Lee whose telephone number is 571-272-2374. The examiner can normally be reached on M-F.
